

# Animation Workshop

To my activities as animation film director and producer I held workshops for several clients (see the list below with links to the workshop results). Ten to twelve participants (12 years of age and over) realize their own film and become acquainted with the production process of an animation film, which begins with the development of an idea and ranges from the shooting and animation procedure to the editing and sound design.

In collaboration with the artist Maja Oschmann (co-director of VIRTUOSO VIRTUAL) I offer special workshops about the visualization of music.

The participants are drawing with charcoal, Japan brush, reed pen and black ink and express their emotions while listening to a self composed music. At a second step the attendees draw, model or photograph several movements as animated loops, which were inspired by the music.

Finally they present their animations like a performance with eight record players, live, alternating and synchronized to the music.
